- Project Documentation : <https://intip.in/MSIB7DOCSADHI>
- Project Report : <https://drive.google.com/file/d/1udyg9hxG28n-m4CFoNMrJLq485K9p0wf/view?usp=sharing>

PT Nusantara Regas
as System Information Intern

Aug 2025 - Sep 2025

- Designed and implemented an end-to-end Permit to Work Form application, from data input to PDF export, using Next.js, React, Tailwind, and Zustand.
- Assisted in network monitoring and management through exposure to Security Operations Center (SOC) practices and FleetVision system.
- Contributed to operational efficiency by digitizing permit issuance processes.

Projects

IoT Glove Hand-sign Translator

Sep 2023 - Des 2023

- Sign language interpreter gloves are a project assignment for the Knowledge-based system design course using IoT. This project was made for 3 months and received an AB grade.
- Using a ESP-32 microcontroller with 5 flex sensors with output values that will be converted into sound and also a small display on the glove.
- Project Presentation : <https://intip.in/HandSignPresentation>

Starter Academy Website

Jun 2023 - Aug 2025

- A dynamic website project from the PKM-K competition which was developed from the beginning until the release of the first version. The Starter Academy website was developed for 3 months, successfully getting 30+ first buyers and 50+ registered accounts 2 months after launching.
- Using Next.js 13, Tailwind CSS on the Front-end side and Laravel on the Back-end side. My web team and I succeeded in integrating MidTrans payment gateway for automatic payments, and S3 compatible object storage digital Ocean CDN for secure and private video storage.
- Website : starteracademy.id

Personal Portofolio Website

Jun 2024 - Jul 2024

- A static portfolio website for self branding with a minimalist and attractive appearance. This website is also for my freelance business in the realm of videography.
- Using Next.js 13, Tailwind CSS on the Front-end side. Using React environment with some interactive library.
- Website : <https://tomvisual.vercel.app>
- Figma : <https://intip.in/TomVisualFigma>
- Github : <https://github.com/txmlrd/tomvisual>

Vonk's Design Website

Jul 2024 - Aug-2024

- A static portfolio website for Vonk's Design Architecture and Design Contractor in Bali.
- Using Next.js 13, Tailwind CSS on the Front-end. Using React environment with some interactive libraries. And in the future this website will use firebase to make the website more dynamic in terms of querying data or just CRUD.
- Github : <https://github.com/txmlrd/vonksdesign>
- Website : <https://www.vonksdesign.com>
- Figma : <https://www.figma.com/design/xospXgamYGYqyAAHyg/WNI/Vonk's-Design?node-id=0-1&t=l0ByEHWkCfBX8oUc-1>

AIS Ship Tracker – Web Application Development

Dec 2024 - Jan 2025

- Built a web-based AIS (Automatic Identification System) ship tracking application with real-time ship visualization.
- Implemented interactive maps using Leaflet.js and integrated AIS data through RESTful API.
- Streamed fuel flowrate simulation data in real-time using the MQTT protocol (mosquitto mqtt) and node red.
- Calculated ship pollution levels and visualized data insights using Chart.js.
- Developed the entire application using vanilla JavaScript (ES6), HTML, and CSS with fully responsive design.
- Github : <https://github.com/txmlrd/ais-service> <https://github.com/txmlrd/ais-ship-stream>

Final Project - Face Recognition Microservices Backend

Sept 2024 - July 2025

- Built an authentication & authorization system using face recognition (DeepFace) and password-based login with docker container system.
- Implemented Flask microservices (Auth, User, Role, API Gateway) with JWT + Redis blacklist for secure token management and MySQL for Databases.
- Developed RESTful APIs and a crucial feature token system requiring additional biometric verification for sensitive actions.
- Evaluated performance (response time, throughput, error rate) to ensure system reliability.
- Website : <https://team-edu.vercel.app/>
- Demo video : <https://www.youtube.com/watch?v=dRW56fCHYsA&t=171s>

Ajoungnarl - Journal-Blog Concept Portofolio

Sep 2025 - Present

- Built a personal journaling and blogging platform from scratch using Vite, React, and Firebase.
- Implemented features for post creation, rich text editing, tag management, and image handling (on going).
- Designed a clean and responsive UI to ensure a smooth reading and writing experience across devices.
- Integrated Firebase Firestore for scalable data management and authentication for secure access.
- Github : <https://github.com/txmlrd/mini-blog>
- Website : <https://ajoungnarl.vercel.app/>

Freelance Videographer & Photographer Service

Jan 2020 - Present

- A freelance project that focuses on creating videography and photography. Successfully created 4+ Balinese Wedding & Pre-wedding projects, several graduation college photo concepts, video music and other paid video projects.
- Using professional tools such as Sony A6000 complete with the necessary lenses and gimbal to support maximum results
- Instagram Portofolio : [@tomvisuall](https://www.instagram.com/tomvisuall)

Course Certificate

The Complete 2024 Web Development Bootcamp

Jan 2024 - Jun 2024

- An Udemey online course that studies Full-Stack Web Developer contains HTML, CSS, Javascript, Node, React, PostgreSQL, Web3 and DApps.
- Course link : [Udemey Course](https://www.udemy.com/course/the-complete-2024-web-development-bootcamp/)
- Certificate : [Udemey Certificate](https://www.udemy.com/certificate/UC-123456789/)

Hard Skill

Language

Indonesia & English.

Framework

Next JS, React.js, Tailwind CSS, Laravel, Axios, Express.js, Flask, Bootstrap.

Programming Language

HTML, CSS, TypeScript, JavaScript, C++, C, Python, PHP.

Application

VS Code, Postman, Figma, Docker, Vercel, Git, Adobe Premiere Pro, Adobe After Effect, Adobe Illustrator, Capcut.

Others

Website Building, Programming & Coding, UI UX Designing, Cinematography, Visual Design.

Soft Skill

Problem-Solving

Identify issues efficiently, Develop and implement effective solutions.
